The Ex-Parliamentarians Association of Nagaland (Ex-PAN) has urged the Government of Nagaland to take immediate steps to operationalise the Register of Indigenous Inhabitants of Nagaland (RIIN) and strengthen the implementation of the Inner Line Permit (ILP) regime across the State. In a representation submitted to the government, Ex-PAN appreciated the decision to extend the ILP under the Bengal Eastern Frontier Regulation, 1873 to the entire State, including Dimapur. However, the Association cautioned that effective implementation would remain uncertain unless the State and district administrations are adequately prepared to address emerging challenges. On the recent developments in the North-Eastern region, Ex-PAN stated that States have become increasingly alert to the risks allegedly posed by large numbers of illegal immigrants, particularly from neighbouring Bangladesh. It maintained that strict enforcement of the ILP remains the only effective safeguard to protect the land and people of Nagaland, while ensuring that the constitutional rights of bona fide Indian citizens living and working in the State are not infringed upon. The Association further emphasized that effective enforcement of the ILP requires a robust mechanism to clearly distinguish genuine Indian citizens from illegal immigrants. In this context, Ex-PAN identified the RIIN as a critical foundation for establishing such a system and underscored the urgent need for its operationalisation.

The Government has prevented six hundred sixty Crore Cyber Fraud Losses in just 6 months with the help of the Financial Fraud Risk Indicator (FRI). The Ministry of Communication informed that more than 1000 banks, third-party application providers and Payment System Operators (PSOs) have onboarded the Digital Intelligence Platform (DIP) and started adopting FRI actively. FRI is driven by the active support of the Reserve Bank of India and the National Payments Corporation of India. The Ministry also appreciated the efforts of all vigilant citizens and Cyber Warriors who are actively leveraging the Sanchar Saathi platform to report suspected fraud communications.

The United States’ AST SpaceMobile BlueBird Block-2 communication satellite will be launched by ISRO tomorrow at 8:54 am local time aboard the LVM3-M6 rocket. This sixth operational flight of LVM3 is a dedicated commercial mission that will place the satellite into Low Earth Orbit.

V/C- BlueBird Block-2 will be the largest commercial communication satellite in LEO and the heaviest payload launched by LVM3 from India. The satellite is part of AST SpaceMobile's next-generation system to provide direct cellular broadband connectivity to standard smartphones without special hardware. It aims to offer global 4G/5G connectivity, enabling calls, web access, and video services directly from space. LVM3 is a three-stage launch vehicle developed by ISRO and has previously launched Chandrayaan-2, Chandrayaan-3, and OneWeb missions.
